DETAILED ACTION

Election/Restriction

- 1. Applicant's election of claims 13-19 and 26-29 in Paper No. 5 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
- 2. This application is hereby further restricted because it contains claims directed to the following patentably distinct species of the claimed invention:

Claim 16, drawn to a first embodiment wherein the impurity concentration of the connecting area is higher than the impurity concentrations of all the sources and drains of the first and second cell areas.

Claim 15, drawn to a second embodiment wherein an impurity concentration of the connecting area is the same as an impurity concentration of one of the sources and drains of the first and second cell areas, and is higher than an impurity concentration of the other of the sources and drains of the first and second cell areas.

Claim 17, drawn to a third embodiment wherein at least one part of the connecting area has almost the same impurity depth and almost the same impurity concentration of one of a source/drain area and an off-set area of MOS transistor forming a surrounding circuit of the first and second memory cell areas.

Art Unit: 2811

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Thien Tran** whose telephone number is (703) 308-4108. The examiner can normally be reached on Monday through Friday from 7:30AM to 4:00PM.

Art Unit: 2811

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Tom Thomas**, can be reached on (703) 308-2772. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-7722.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
